

*The Covid-19 pandemic has had a tremendous impact on our campus and community. The people of UK Facilities Management remain the “boots on the ground” for UK, providing the essential services needed to keep our campus safe, secure, and positioned to respond to the evolving crisis. The strength each of you demonstrate daily is inspiring and represents such courage and compassion. We are in this together and we will get through it together. **Thank you for everything you do.** – Mary Vosevich, Vice President for Facilities Management*

## OUR PEOPLE.

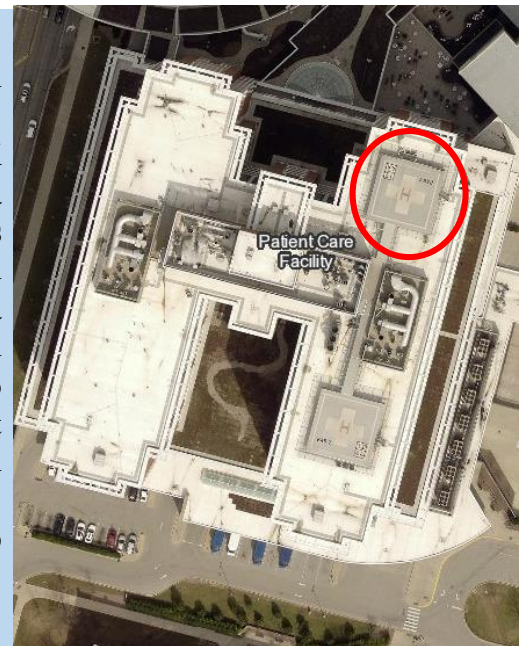

## OUR STORIES.

The daily work of keeping our campus facilities functioning at high levels through exceptional maintenance and operations is one of the hallmarks of UK **Facilities Management**. None of this work would be possible without the leadership, dedication, and talent of Facilities Management employees. At left, **Tommy Ralls**, a plumber with the Campus Physical Plant’s Central Area, installs a new shut off valve and hydrant at the College of Fine Arts’ Guignol Theater (right).

On the roof of UK’s Patient Care Facility, more than 200 feet above the street and sidewalks below, there are two helipads. These facilities are critical to UK HealthCare’s role as the region’s top trauma care hospital. Recently, the **Facilities Management Medical Center’s** teams had been monitoring and attempting to resolve a leak on Pad 1 (circled at right). They had been unable to locate the leak from below so last week, **Lonnie Driscoll** led a project with assistance from **Bill Collins** and contractors that cut through the helipad, located a pipe that was causing the leak (top left), and repaired the area (bottom left). **GREAT WORK TEAM!**
