

*The Covid-19 pandemic has had a tremendous impact on our campus and community. The people of UK Facilities Management remain the “boots on the ground” for UK, providing the essential services needed to keep our campus safe, secure, and positioned to respond to the evolving crisis. The strength each of you demonstrate daily is inspiring and represents such courage and compassion. We are in this together and we will get through it together. **Thank you for everything you do.** – Mary Vosevich, Vice President for Facilities Management*

OUR PEOPLE. ————— OUR STORIES.

Welcome back all

2021

Here we go!

Let's make this a great year!

Did you know? Origin of our calendar

The 12 month calendar we use to mark solar years is based on a Roman calendar, revised in the first century BC by Julius Caesar. Caesar, on the advice of Sosigenes –an astronomer from Alexandria - added 90 days to the previous calendar and established the solar year as 365 days and six hours. The Romans established the concept of the leap year to accommodate the extra six hours and added a day to February, their shortest month, every four years.
