

*The Covid-19 pandemic has had a tremendous impact on our campus and community. The people of UK Facilities Management remain the “boots on the ground” for UK, providing the essential services needed to keep our campus safe, secure, and positioned to respond to the evolving crisis. The strength each of you demonstrate daily is inspiring and represents such courage and compassion. We are in this together and we will get through it together. **Thank you for everything you do.** – Mary Vosevich, Vice President for Facilities Management*

OUR PEOPLE. ————— OUR STORIES.

The Blue Box Theater in the Gatton Student Center (circled at left) has been a “shelled” space since the construction of the building was completed in 2018. Shelled spaces are spaces within new construction that are left unfinished at the conclusion of initial construction. The shelled Blue Box Theater began to change last week when **Facilities Management teams** started working on the space (below) to convert it to a walk-up Covid 19 testing site. All UK students enrolled for the spring semester who plan to come to campus at any point in the semester are required to take a Covid-19 entry test between January 14-30.

Friday’s Photo Collage was a shout out to our **Grounds teams** who responded to the snow that blanketed the campus on December 24 and 25 by returning to campus to ensure safe access to critical campus facilities. Several other **Facilities teams** worked continuously throughout the break including members of the **Facilities Management Medical Center** staff. At left, supervisor **Hal Van Etten** replaces a fan motor on New Year’s Day with assistance from **Steven Curry** and **Jacob Roe** (not pictured).
