

*The Covid-19 pandemic has had a tremendous impact on our campus and community. The people of UK Facilities Management remain the “boots on the ground” for UK, providing the essential services needed to keep our campus safe, secure, and positioned to respond to the evolving crisis. The strength each of you demonstrate daily is inspiring and represents such courage and compassion. We are in this together and we will get through it together. **Thank you for everything you do.** – Mary Vosevich, Vice President for Facilities Management*

OUR PEOPLE. ————— OUR STORIES.

How it started...

How its going...

Here's our first take on the popular internet meme of **How it Started/How its Going**. The Kirwan Blanding Complex opened in 1968 (left) and provided housing for nearly 3000 students in its two signature towers and eight accompanying lowrises. Over the past year, the removal of the buildings has been coordinated by CPMD Project Manager **Keith Ingram**. Almost all demolition debris has been removed, much of the site has been regraded, and topsoil is currently being applied to portions of the site (right – photo by **Harold “Tree” Sandford**).

Olivia Tussey and Bethany Schagane, student interns with **UK Recycling**, have organized **Waste Reduction Week** for next week (April 12-16). Working with their mentors **Joanna Ashford** and **Esther Moberly**, the pair has developed unique and engaging events for everyday (and everyone) next week. This includes a workshop on properly maintaining your car conducted in partnership with the **FM Garage**, an outdoor documentary film screening, and a scavenger hunt with prizes. **GREAT WORK OLIVIA AND BETHANY!** Full event schedule and additional info here: <https://storymaps.arcgis.com/stories/087dc53270e846e782a78d388169aca6>
