

*The Covid-19 pandemic has had a tremendous impact on our campus and community. The people of UK Facilities Management remain the “boots on the ground” for UK, providing the essential services needed to keep our campus safe, secure, and positioned to respond to the evolving crisis. The strength each of you demonstrate daily is inspiring and represents such courage and compassion. We are in this together and we will get through it together. **Thank you for everything you do.** – Mary Vosevich, Vice President for Facilities Management*

OUR PEOPLE.

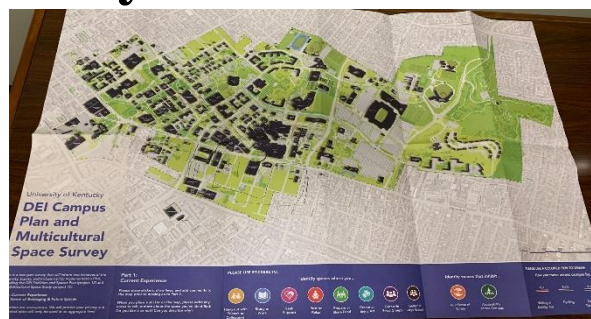

OUR STORIES.

The University wants to hear from you this week!

Deadline to submit is Friday, May 21!

Hardcopies of the **Diversity Equity and Inclusion Campus Plan and Multicultural Space Survey** are available from your supervisor. We know that every student, staff, and faculty member experiences our campus from their own unique perspective and we want to know about your experience. The results of the survey will help shape the DEI Facilities and Spaces Plan as part of UK’s commitment to a campus that is welcoming for all. The hard copy is a two-sided fold out with questions on one side and map that can be marked up to reflect your experience on the other. Please plan to take a few minutes this week to complete the Survey. Completed surveys should be placed in dropboxes (pictured at left) conveniently located in these seven locations:

- Peterson Service Bldg, front entrance
- White Hall, Area Maintenance
- Kelly Bldg
- WT Young, circulation desk area
- AG North, John Gambill’s office area
- Grounds Greenhouse
- Student Center, staff break area

Shout out to **UK Recycling** to for always innovating and working with campus partners to make recycling easy and convenient for our campus. Their efforts help keep tons of material (literally) from going to landfills each week. Earlier this spring they launched these new pizza box recycling bins at key locations because it was difficult to fit the boxes in our existing collection bins which was causing issues for both **Custodial** and **Grounds**. The program will be expanded to the residence halls in the fall. These new bins are made from 97% recycled plastic!
